School Dress Code Policy

Rationale/Purpose

The *School Education Regulations 2000* empowers school communities to develop a dress code for the children attending their school. The regulations allow a school to establish what is safe and appropriate to wear at school and on excursions as well as determine what is inappropriate. The relevant Regulation states:

33. *The following matters may be provided for in a government school's dress code:*

- a) *standards of what is acceptable in relation to the clothing worn by students at the school including headwear or footwear;*
- b) *standards of what is acceptable in relation to other aspects of the personal presentation of students.*

Issues relating to the implementation of a school dress code are covered under Regulations 33 – 36 of the *School Education Regulations 2000*.

The School Board determines the standards of what is acceptable clothing to be worn by students at the school. This includes headwear and footwear, and other aspects of personal presentation of students. Having a policy that acknowledges school community support allows the school to make a clear statement about its expectations of the children in this context.

Benefits of Dress Requirements for students:
