

## Using Seesaw in the Classroom 2023

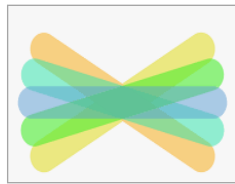

Dear Parents/Carers

In 2023, **Seesaw** is being implemented in **K-6** classrooms.

Seesaw is a cloud based storage and communication system. This platform gives your child creative tools to capture and reflect on their learning 'in real time'. In addition, their work is then shared with their family.

### Seesaw:

- engages and provides parents/carers with a window into their child's classroom and into their learning process
- provides students with an authentic audience to view their work
- makes communication with their class teacher seamless
- becomes a digital portfolio record of their work at school and
- provides a personalised window into your child's school day

**Seesaw Learning App**  
(Apple App Store)

**Seesaw OneApp**  
(Goggle Play)

Parents/Carers can download the **Seesaw Learning App** (from the Apple App Store) for iOS or **Seesaw OneApp** (on Goggle Play) for Android however, most web browsers can be used to view student's learning artefacts.

Once downloaded, you will receive a notification to see, hear and respond to your child's learning. Only you have access to your own child's work. All school content is stored within Australia.

Some items (such as teacher notes, class newsletters, and photos or videos of the class completing activities) can be shared to 'Everyone' in your child's class.

Yours sincerely,

*F Dillon*
